PROFESSIONAL SUMMARY

Senior Full Stack Developer with **5+ years** of experience delivering **multi-tenant SaaS**, **fintech** and **AI-powered products** across web, iOS and Android. Sole engineer on **Effora**, an AI business suite with eight production **OpenAI API** features, plus fintech systems spanning **digital wallets, automated payouts and KYC verification**. Core stack: **TypeScript, React, Node.js, NestJS, PostgreSQL, AWS**. **PSM I** certified; Dubai-based with transferable visa.

CORE TECHNICAL SKILLS

AI & LLM: OpenAI API (GPT-4o, GPT-4), OpenAI Vision, Conversational AI, Chatbots, RAG-style natural-language querying over live data, AI-driven dynamic pricing, Recommendation Engines, Prompt Engineering, AI-assisted development (Claude, Cursor, GitHub Copilot)

Backend: Node.js, NestJS, Express.js, TypeScript, REST APIs, GraphQL, Microservices, Event-Driven Architecture, WebSockets / Socket.io, Webhooks, Message Queues, Swagger / OpenAPI, PHP, Laravel

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Query / TanStack Query, Tailwind CSS, Material UI, Ant Design, Framer Motion, Three.js, Core Web Vitals

Mobile: React Native (iOS & Android), React Navigation, Reanimated, Gesture Handler, NFC Integration, FCM Push Notifications, Biometric Authentication, In-App Messaging, Arabic RTL & i18n, App Store & Google Play releases

Fintech & Payments: Digital Wallets, Transaction & Credit Ledgers, Automated Payouts, Multi-Gateway Payment Integration, Subscription Billing, Idempotent Webhook Handling, Reconciliation, KYC / Identity Verification, Web3 & DeFi (lending, staking)

Databases: PostgreSQL, MongoDB, MySQL, Redis, Prisma ORM, ERD & Schema Design, Indexing, Query Optimization

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD Pipelines, Bitbucket Pipelines, GitHub Actions, Cloudflare, Linux, Nginx

Security & Architecture: OAuth 2.0, JWT, RBAC, OTP / MFA, OWASP Top 10, Multi-Tenant SaaS, Tenant Isolation, Real-Time Systems, System Design, Scalability

Practices: Agile / Scrum (PSM I certified), Sprint Planning, Code Review, Technical Documentation, Unit & Integration Testing, Git / Bitbucket

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer | Softbuilders Software Design

Dubai, United Arab Emirates | August 2024 – Present

- Sole engineer on **Effora** (effora.com), a **multi-tenant AI SaaS platform** for salon and wellness businesses — owned system architecture, NestJS backend, Next.js web app and React Native mobile apps end to end.
- Engineered eight production **AI features on the OpenAI API**: a 24/7 **AI receptionist** handling inbound phone bookings, a chatbot with smart human escalation, a **natural-language business assistant** querying live operational data, voice booking, AI-driven dynamic pricing, recommendations, upselling and content generation.
- Integrated **OpenAI Vision for automated KYC** — document and identity verification — replacing manual onboarding review and cutting client verification turnaround.
- Built a **digital wallet and rewards platform** in NestJS, PostgreSQL and Redis: credit ledger, automated payouts, transaction history and **idempotent webhook handling** to eliminate duplicate credits.
- Delivered **NFC contactless card activation** and **Shopify-triggered payout reconciliation** for a UAE membership platform (Motifino).
- Shipped multiple **cross-platform React Native apps (iOS & Android)** to the **App Store and Google Play** for UAE enterprise clients, with FCM push, biometric login and **Arabic RTL localization**.
- Improved **API response performance 20%** through modular NestJS service design, Redis caching and PostgreSQL index tuning.
- Cut client-side server requests **40%** with React Query caching and Redux Toolkit state normalization; improved **Core Web Vitals 20%** via code splitting and lazy loading.
- Architected **QuickdropX** logistics microservices with multi-gateway payments, cutting operational overhead **70%**; built **Homnifi DeFi360** lending, borrowing, staking and trading dashboard (**+25% scalability, +40% engagement**).

- Secured multi-tenant APIs with **OAuth 2.0, JWT, RBAC, OTP/MFA** and tenant-level data isolation against **OWASP Top 10**; implemented real-time sync with WebSockets and an event-driven webhook architecture across iOS, Android and web.
- Owned **CI/CD (Docker, Bitbucket Pipelines)** and store release management; delivered in Agile sprints with code review and technical documentation.

Software Engineer | ConsoliAds Pte Ltd

Lahore, Pakistan | November 2022 – June 2024

- Scaled **Node.js, Express and TypeScript** backend services to handle **1M+ production requests**, with MongoDB data modelling on **AWS**-hosted infrastructure.
- Designed **REST APIs** and backend infrastructure supporting **10,000+ active users** across web and mobile products; documented with **Swagger/OpenAPI**.
- Raised **data retrieval efficiency 23%** via ERD-led database design, schema normalization, query optimization and a **Redis caching layer**.
- Increased **user engagement 20%** by designing recommendation algorithms and referral systems; lifted match relevance **15%** with advanced search, filtering and score-based ranking logic.
- Streamlined scheduling to remove **70%** of conflicts with a meeting-management and calendar module featuring automated availability handling.
- Developed a responsive admin dashboard in **React, TypeScript and Tailwind CSS**; implemented **JWT authentication and RBAC**, AWS S3 storage and webhook-driven workflows.

Associate Software Engineer | DevsSpace

Lahore, Pakistan | April 2022 – November 2022

- Launched **PrimaryLeap** (primaryleap.co.uk), a UK EdTech SaaS platform, using **Laravel, PHP, MySQL** and Bootstrap 4 with multi-role access for students, parents, educators and schools.
- Implemented the curriculum-aligned resource library with categorization, search and filtering across thousands of assets; integrated **subscription sign-up and payment flows**.
- Accelerated page load times and backend throughput **15%**; recognized as **Team of the Month** for early delivery of a client project.

Associate Software Engineer | Evonicsoft

Dubai, United Arab Emirates | April 2021 – April 2022

- Produced responsive, cross-browser web interfaces and integrated **REST APIs** across **8+ client projects**, delivering every build inside Agile sprint deadlines.
- Resolved **100+ production defects** and improved page load performance **15%** through asset and query optimization, working to code-review standards set by senior engineers.

KEY PROJECTS

- **Effora** — Multi-tenant AI business suite: 8 OpenAI-powered tools plus calendar, CRM, marketing automation, loyalty, inventory and payroll (NestJS, Next.js, React Native, PostgreSQL, Redis).
- **Motifino** — NFC membership app: digital wallet, credit ledger and Shopify-triggered automated payouts (React Native, NestJS).
- **Mai HRMS** — UAE payroll, attendance and workforce SaaS with role-based dashboards across web, iOS and Android.
- **QuickdropX** — Logistics microservices platform with multi-gateway payments and event-driven order tracking.
- **Homnifi (DeFi360)** — Web3 lending, borrowing, staking and trading dashboard.

EDUCATION & CERTIFICATION

BSc Computer Science — University of Sargodha, Pakistan | 2017 – 2021

Professional Scrum Master I (PSM I) — Scrum.org
