MUHAMMAD ASAD

Senior Frontend Developer | React.js, Next.js & TypeScript Specialist | React Native

Dubai, UAE | +971 55 124 5583 | asadnadeem005@gmail.com

LinkedIn: Muhammad Asad | Portfolio: muhammad-asad.vercel.app | Valid UAE Driving License

PROFESSIONAL SUMMARY

Senior Frontend Developer with 5+ years of experience architecting high-performance, scalable web and mobile interfaces using React.js, Next.js, React Native, and TypeScript. Deep expertise in component-driven architecture, state management (Redux Toolkit, React Query/TanStack Query), and building banking-grade enterprise UIs with a strong focus on performance, real-time data, and cross-platform consistency (iOS, Android, Web). Skilled at translating complex backend and Web3/DeFi systems into intuitive, production-grade interfaces. Proficient in AI-assisted engineering using Claude AI, ChatGPT, Cursor AI, and GitHub Copilot. Dubai-based — immediately available to join.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, React Query / TanStack Query, Tailwind CSS, Material UI, Ant Design, Framer Motion, Three.js
Mobile Dev	React Native, TypeScript, iOS (Xcode), Android Studio, Visual Studio Code, React Navigation, FCM Push Notifications, NFC Integration, Reanimated, Gesture Handler, In-App Messaging
Backend	Node.js, NestJS, Express.js, PHP, Laravel, REST APIs, GraphQL, Microservices, WebSockets, Socket.io, JWT, OAuth 2.0, Swagger, RBAC
Databases	MongoDB, MySQL, PostgreSQL, Redis, Prisma ORM
Cloud & DevOps	AWS S3, Docker, CI/CD Pipelines, Bitbucket Pipelines, Cloudflare, Linux
AI Dev Tools	Claude AI, ChatGPT, Cursor AI, GitHub Copilot, Prompt Engineering
Architecture	SaaS, Microservices, Event-Driven, Real-Time Systems, RBAC, Web3 / DeFi, Generative AI Integration
Agile / Scrum	Professional Scrum Master (PSM I), Sprint Planning, Code Reviews

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Softbuilders Software Design LLC — May 2024 – Present

Dubai, UAE

- ▸ Architected and delivered multiple cross-platform mobile applications (iOS & Android) using React Native, TypeScript, and NestJS — published on App Store and Play Store for UAE enterprise clients.
- ▸ Reduced frontend server requests by 40% via React Query caching and Redux Toolkit state optimization, improving mobile and web app performance across all platforms.
- ▸ Improved Core Web Vitals and page load performance by 20% through code-splitting, lazy loading, and modular component architecture, ensuring banking-grade UI reliability across enterprise SaaS products.
- ▸ Engineered real-time mobile and web workflows using WebSockets, event-driven architecture, and webhook integrations, enabling live data sync across iOS and Android.
- ▸ Accelerated feature delivery using AI-assisted tools including Claude AI, Cursor AI, and GitHub Copilot, maintaining high code quality across Agile sprint cycles.

Frontend Developer | ConsoliAds Pte Ltd — Nov 2022 – Mar 2024

Lahore, Pakistan

- ▸ Built high-performance, reusable React.js components and TypeScript-driven UI modules powering mobile-facing products used by over 1 million end users, optimizing rendering efficiency and state management.
- ▸ Increased user engagement by 20% by designing recommendation algorithms and referral systems embedded into mobile-facing APIs.
- ▸ Delivered scalable cloud-based application infrastructure on AWS, contributing to CI/CD pipeline reliability and production deployment workflows.

Junior Frontend Developer | DevsSpace Ltd **Feb 2021 – Nov 2022**

Lahore, Pakistan

- ▸ Improved frontend load times and rendering performance by 15% through bundle-size optimization, lazy loading, and component-level profiling.
- ▸ Earned recognition as Team of the Month for ahead-of-schedule project execution, reflecting consistent Agile delivery excellence and cross-team collaboration.

KEY PROJECTS

Villa Miami — Luxury Villa Rental Platform (Frontend + CMS)

Tech Stack: React · Next.js · TypeScript · Headless CMS · Tailwind CSS

- ▸ Built a fully responsive villa rental frontend integrated with a headless CMS, giving the marketing team full control over property listings, pricing, and page content without developer involvement.
- ▸ Engineered an interactive booking/reservation calendar and inquiry form system with real-time availability syncing, reducing manual booking coordination for the operations team.

Mai HRMS — AI-Powered HR Management Platform (iOS & Android)

Tech Stack: React Native · React.js · NestJS · TypeScript · MongoDB · WebSockets · AWS | App Store & Play Store

- ▸ Spearheaded delivery of an enterprise HRMS platform on web and mobile (iOS & Android) managing payroll, attendance, leave, and real-time workforce workflows for UAE businesses.
- ▸ Implemented multi-role access control for HR administrators, line managers, and employees — each with tailored mobile dashboards and scoped data visibility.
- ▸ Established scalable SaaS architecture using React Native, NestJS, MongoDB, and WebSockets enabling real-time analytics and AI automation workflows.
- ▸ Paired with Claude AI and GitHub Copilot throughout development to auto-generate boilerplate and accelerate delivery of the multi-role dashboard modules.

QuickdropX — Logistics & E-commerce Platform

Tech Stack: Node.js · NestJS · MongoDB · React.js · TypeScript · Microservices · AWS

- ▸ Led end-to-end development of a scalable logistics platform supporting international shipping, order lifecycle management, and multi-gateway payment processing.
- ▸ Designed a microservices-based backend integrating multiple shipping carriers and payment gateways, reducing operational overhead by 70%.
- ▸ Constructed eBay API integration and automated Amazon product import pipeline, eliminating manual inventory entry across thousands of SKUs.
- ▸ Relied on Claude AI and ChatGPT during development to troubleshoot integration logic faster and cut debugging time across shipping and payment gateway modules.

Homnifi — DeFi360 Web3 Integration Platform

Tech Stack: React · TypeScript · NestJS · MongoDB · Web3 / DeFi

- ▸ Led frontend engineering of the DeFi360 integration, building the React/TypeScript UI that gives users unified access to lending, borrowing, trading, and staking across multiple DeFi ecosystems from a single dashboard.
- ▸ Designed and maintained a scalable Web3 platform UI and admin panel using React, TypeScript, and NestJS-backed APIs, streamlining component architecture to improve platform scalability by 25% and user engagement by 40%.
- ▸ Collaborated on backend performance work — database indexing and service-level optimizations — to ensure high-throughput API responses powering real-time data views for decentralized app users.

CERTIFICATIONS

Professional Scrum Master (PSM I) — Scrum.org

EDUCATION

Bachelor of Computer Science (BSCS)

University of Sargodha, Pakistan | 2017 – 2021
